

The Top Wellness Hotel Suites in the World

A collection of hotels and resorts that are taking well-being to the next level.

By Alex Martin

Elite Traveler is pleased to present the second edition of Top 50 Wellness Hotel Suites in the World, featuring a collection of the best hotels, resorts and exclusive-use accommodations that take the concept of well-being to the next level.

The search for well-being is intrinsically tied to travel. We travel to find respite, solace and space, to reconnect with loved ones, and to reflect on life's tribulations. We travel in the hope of returning with our mind, body and soul in a better place than when we left.

In this collection, you'll find extraordinary in-suite facilities, such as zen gardens, private treatment rooms and hammams, all for your exclusive use. In some cases, we have selected a suite not for their private facilities, but because the hotel is a world leader in spa and wellness facilities.

But for many of us, wellness can't be found in a spa treatment room. We have also included suites that are in spectacular locations and encourage guests to explore the natural world around them. From the rolling hills of Provence to the healing waters of Yucatan, you'll find an eclectic mix of wellness wonders with our inaugural collection.

Top 50 Wellness Suites 2024

Royal Villa, Chablé Yucatán

Royal Villa, Chablé Yucatán

Chablé Yucatán emerges from the bones of a 19th-century hacienda deep in the Mexican jungle. Tuck into the spa's cenote, one of the region's natural springs sacred to the Mayans. Decompress further in your Royal Villa, a 10,000-sq-ft residence with three bedrooms, a private spa cabin, movie theater, pool and outdoor dining. And there's always a quiet spot in this villa to take respite from your traveling companions. Romantics will love the artsy headboard, tooled by artisans from a recovered tree, and a massive 1,100-lb double tub, its limestone drawn from a local quarry.

OVERVIEW AWARDS

In the dense Mexican jungle, Chablé Yucatán emerges from the bones of a 19th-century hacienda and a repurposed agave factory. Tuck into the spa's cenote, one of the region's natural springs that are sacred to the Mayans. Or, take a sweaty cure in one of Chablé Yucatán's two authentic temazcals. Decompress further in your Royal Villa, a 10,000-sq-ft residence with three bedrooms, a private spa cabin, movie theater, pool and outdoor dining. And there's always a quiet spot in this villa to take respite from your traveling companions. Romantics will love the artsy headboard, tooled by artisans from a recovered tree, and a massive 1,100-lb double tub, its limestone drawn from a local quarry.
